SUMMARY

Tech Enthusiast │ Proficient in Multiple Programming Languages │ Bridging Innovation and Execution" Thriving at the intersection of creativity and technology, I transform ideas into digital realities through code.

PROJECTS

Library Management System

- The Library Management System (LMS) is a Python-based project designed to manage and organize a library's day-to-day operations.
- It allows librarians to handle book inventories, member registrations, book issue/return processes, and track overdue returns efficiently.

Weather App

- The Weather App is a simple and responsive web application built with React that allows users to check the current weather conditions for any city in the world.
- It fetches real-time weather data from a third-party API and displays it in a user-friendly Interface.

Virtual Assistant

- The Virtual Assistant is a browser-based assistant built using JavaScript that can interact with users through voice or text.
- It listens to user commands, processes them, and responds with relevant information or actions — mimicking the behavior of a basic AI assistant like Siri or Google Assistant.

EDUCATION

Bachelor's of Computer Application   **2023-2026**
ST. Xavier's College of Management And Technology

Intermediate   **2020-2022**
ECR Senior Secondary School

Matriculation   **2019-2020**
Doon Global School
